

*(14) - What type of environment will the pump be seeing? Will it be open to dirt, dust, water, road debris, etc.? Please give details.

*(15) - What will the orientation of the pump be from the two illustrations shown below? (Vertical or Horizontal)

Vertical Pump Orientation

Horizontal Pump Orientation

NOTE: CAN Operation Questions Only:

*(1) - CAN Baud Rate default is Auto Baud Rate Detection. Does this meet your system needs? (Auto Baud Rate Detection supports 250 Kbps, 500 Kbps or 1 Mbps).

--

*(2) - The default J1939 source address is Decimal 32 - Hex 20. Does this meet your pump requirements?

--

*(3) – Will your system use more than (1) EMP pump?

--

*(4) –Is this a new application?

--
